Objective

Enthusiastic BCA student with a passion for Python programming and application development. Looking for an internship opportunity to enhance my technical skills and gain real-world experience in software development.

Technical Skills

◦ Languages	Python
◦ Frameworks	Django
◦ Libraries	Pandas, Numpy
◦ Databases	MySQL
◦ Tools	GitHub, Visual Studio
◦ Programming Concepts	Object-Oriented Programming (OOP), Data Structures, REST APIs

Projects

Collaborative Code Generator

- Built a Python-based application using Tkinter for generating and sharing code.
- Implemented a local server using sockets on port 8080.
- Enabled basic collaboration using networking concepts.
- Connected my collaborative code generator app to an API to fetch AI-generated results

Real-Time Stock Price Tracker

- Built a desktop application to fetch and display real-time stock prices using yfinance API
- Implemented multi-threading to update stock data continuously without freezing the UI
- Designed an interactive GUI using Tkinter for real-time price display
- Processed live market data and displayed updated stock prices at regular intervals

Course Learning Platform - [Clarity Edge](#) (Live)

- Built a full-stack e-learning platform using Django, supporting course modules, video-based lessons, and student enrollment
- Implemented user authentication and enrollment logic, including server-side access control to restrict paid video content to enrolled students only
- Integrated a payment gateway with server-side verification for secure course purchases
- Migrated the database from SQLite to PostgreSQL and deployed the application on Vercel with environment-based configuration for production

Qualifications

◦ BCA, Vikramaditya Institute of Computer Science and Technology —	07/2024 - Present
◦ Class 12 (PCM), St. Jeseoph co-ed school —	2024
◦ Class 10, St. Jeseoph co-ed school —	2022
